

**RECYCLED
PRODUCED WATER
FOR AGRICULTURE**

A CLOSER LOOK AT CAWELO'S FILTRATION PROGRAM

**WHERE DOES
RECYCLED PRODUCED
WATER COME FROM?**

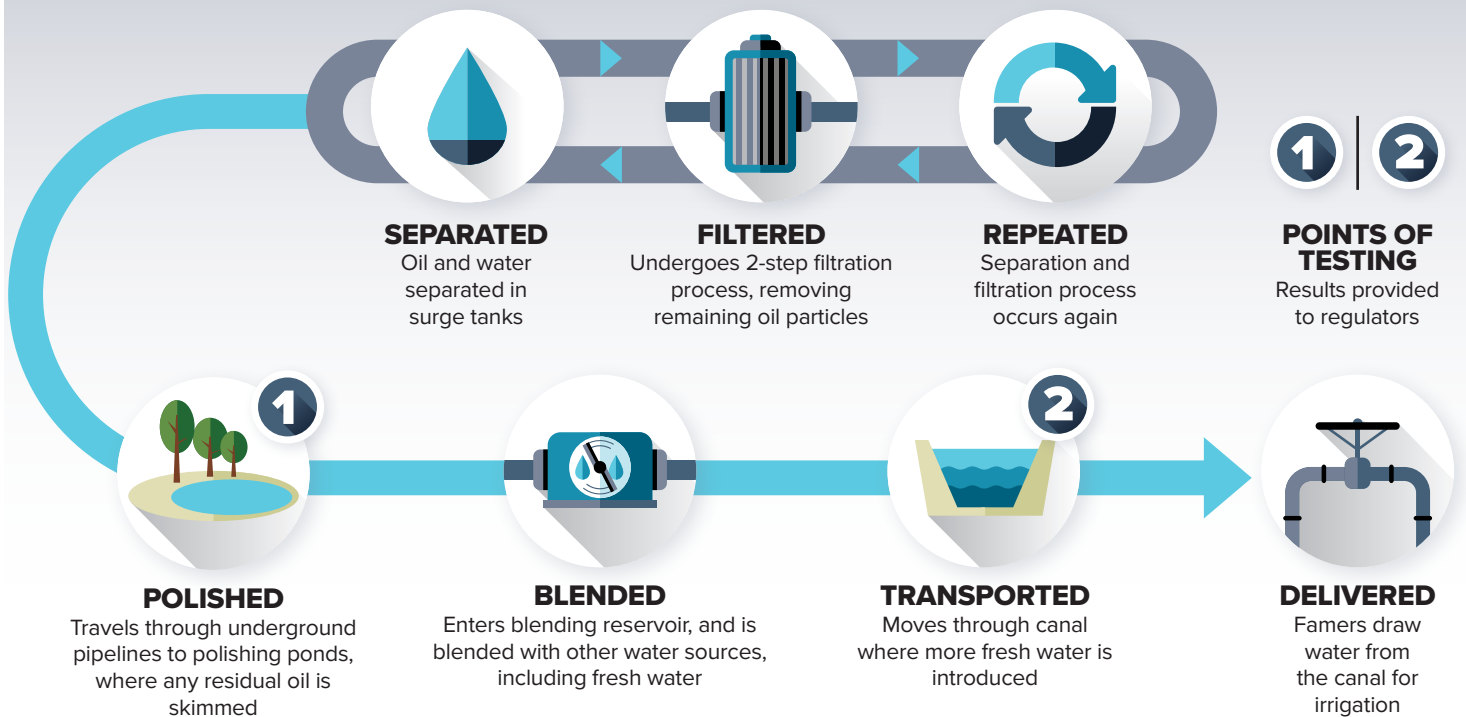

15

Every barrel of oil extracted from Kern River Oilfields naturally generates **BARRELS OF WATER** called produced water

FILTRATION PROCESS:

Cawelo's recycled produced water undergoes a filtration process to ensure water meets regulatory standards.

REVIEW AND TESTING:

Cawelo's recycled produced water is subject to water quality standards and testing established by the Central Valley Regional Water Quality Control Board.

Recycled produced water tested by independent, state-certified laboratory monthly and quarterly

TESTED MONTHLY
for approximately 70 constituents
TESTED QUARTERLY
for approximately 160 constituents

Results provided to regulators for oversight
