Save water. Live well.

AFTER REPLACING HER LAWN WITH CALIFORNIA-FRIENDLY LANDSCAPING...

Candace Kelly Received a Whopping \$25,000 Rebate through the Malibu Smart Program

At \$5 per square foot, the lawn replacement rebate for Malibu residents is higher than ever. Candace Kelly is urging Malibu homeowners to join her in taking advantage of this great opportunity.

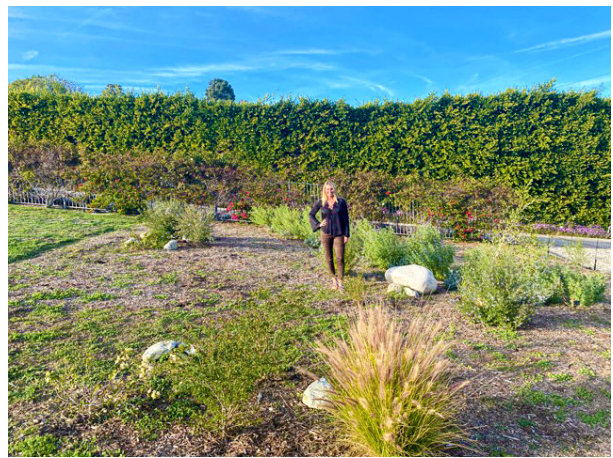

“It’s easier than you think. It seems daunting at the beginning but just keep taking it step-by-step. You’ll be very pleased with the results and the rebates.” — Candace Kelly

Candace Kelly wanted to use less water on her property, and saw that replacing her lawn with native plants and landscape would be a great way to do it. With a limited-time **\$5 per square foot rebate** on turf removal available for residents, she decided to move fast.

And the process was easy – she reached out to the Malibu Smart team for information, submitted a design for the new look of her yard that was quickly approved. Malibu Smart was with her every step of the way and, after she completed her project, she received a \$25,000 rebate for the lawn she removed.

Now, Candace has beautiful native plants and landscape that helps save water each month.

Replacing grass with native plants is one of the best ways to save water and money. **At \$5 per square foot, the lawn replacement rebate amount is higher than ever before. Residents need to hurry because this generous rebate is only available for a limited time.**

MALIBU SMART offers extensive rebates to customers who install high efficiency sprinklers or replace their lawns.

For more information and to schedule an assessment, please call 310-554-6210 or visit www.malibusmart.org.

Customer Options

OPTION 1

Take advantage of **free** high efficiency sprinkler nozzles with **free** installation. It’s quick, easy, and—as we said—**free!**
